Sustainability & Philanthropy

"To be stewards of the land, guardians of the Lake, and solid corporate citizens of the communities in which we operate"

The fact we borrow this land from future generations is a fact that is not lost on us, which is why we remain committed to a continued legacy of land stewardship and environmental redevelopment. With every move we make, our number one focus is always on minimizing our environmental footprint and keeping this pristine area just as pristine for those who come after us, as it was for those who came before us.

Prior to breaking ground on The Lodge, Edgewood completed several "threshold" improvement projects including:

- Treating and removing 500,000 lbs. of sediment per year from Lake Tahoe via enhanced wetlands and deepened filtration settling ponds.
- Realignment and daylighting of Edgewood Creek to allow native fish passage and spawning habitat.
- Acquirement and demolition of several obsolete, environmentally unsustainable properties and restored the land to a natural state, creating a neighborhood park on one site.

LEED, or Leadership in Energy and Environmental Design, certification provides a framework to create healthy, highly efficient, and cost-saving green buildings, and is a globally recognized symbol of sustainability achievement. The Lodge at Edgewood Tahoe is a LEED silver certified building with the following achieved projects:

- Lake sourced cooling system, by extracting 43-degree water from Lake Tahoe, eliminating use of electrical to cool the water, reducing our carbon footprint.
- Use of locally sourced materials, such as the granite sourced from a local quarry, eliminating the impact of long distance shipping for those materials.
- Providing employee bike racks, employee shuttles, and employee locker room showers so that employees can bike and walk to work.
- Pedestrian and bike friendly pathways to local commercial areas to reduce vehicle traffic.
- Significant efficiencies through engineering and landscape design to reduce water usage.

Additional Sustainable and Philanthropic Initiatives:

- Edgewood Tahoe happily offers 4 Tesla electric car charging stations and 2 other all-purpose charging stations for other popular electric car models.
- Edgewood Tahoe is a proud participating member of Clean the World. We donate all partially used soaps and other bottled amenities to this great organization so they may distribute them across the world to citizens who desperately need them due to impoverished conditions. Clean the World has a goal of saving one million lives each year through improvements related to hygiene.
- For the 2019 American Century Championship, Edgewood partnered with the Lake Tahoe Community College Foundation, Lake Tahoe Educational Foundation, and Tahoe-Douglas Rotary for volunteer service hours at Edgewood's concession tents around the golf course. The three organizations received a combined total of \$60,000 for program initiatives specific to education.
- Continued support to the local South Lake Tahoe and Whittell High School Boosters with annual fundraisers totaling nearly \$1 million over the last two decades.
- In partnership with NBC Sports, Edgewood continually supports exceptional local high school students through the Gene Upshaw Scholarship Award.
- At the end of each golf season, Edgewood hosts the Boys & Girls Club of Lake Tahoe fundraiser tournament which regularly raises approximately \$45,000 to \$55,000 for the club.
- In addition, Edgewood Companies donates over \$100,000 per year to local charities and civic organizations as well as supporting many charities with in-kind donations such as overnight resort stays, rounds of golf or culinary offerings to help these charities raise much needed funds.
